Deliverable D3.6 builds closely on the indicator definitions reached in WP3 and database created in WP2. Indicator implementation has been done as part of WP2 and the indicators are directly part of the database being submitted in D2.6. Furthermore, the precise technical details of each indicator are incorporated in the methods paper (D2.8). We decided that concentrating all detailed technical discussion in one document (D2.8) maximizes the transparency of our methodology while the database (D2.6) contains all resulting indicators. This deliverable hence only contains the final indicator definitions which were implemented in the database and eventually placed on the portals."
