Good procurement data has...

- 1. Wide scope**
- 2. Great depth/detail**
- 3. High quality**
- 4. Ready availability**

For full details see:

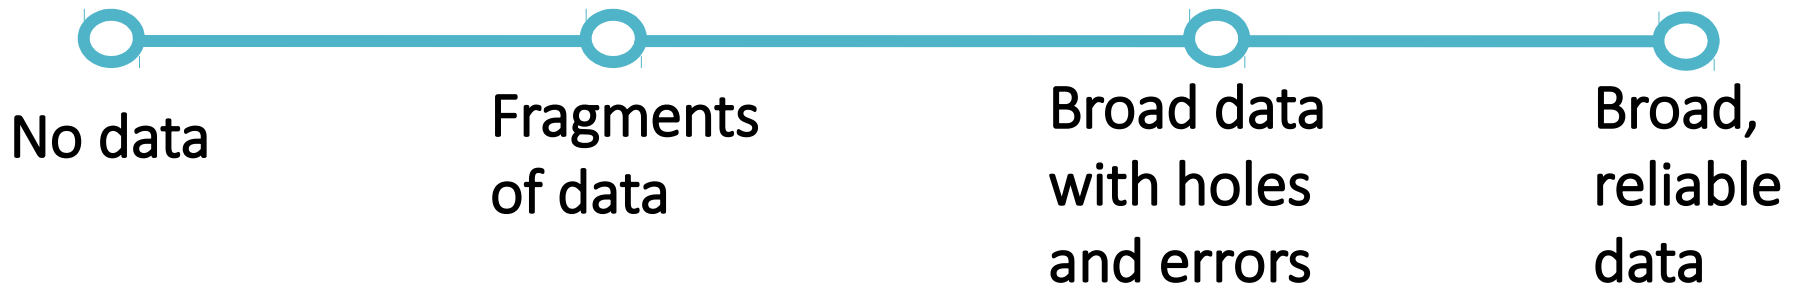

<https://opentender.eu/blog/2017-03-towards-more-transparency/>

Simplified data quality scale

Procurement data quality: use options

Push for change →

Watchdogs →

Error & gap detection →

Research* →

Policy Analyses* →

Market Monitors* →

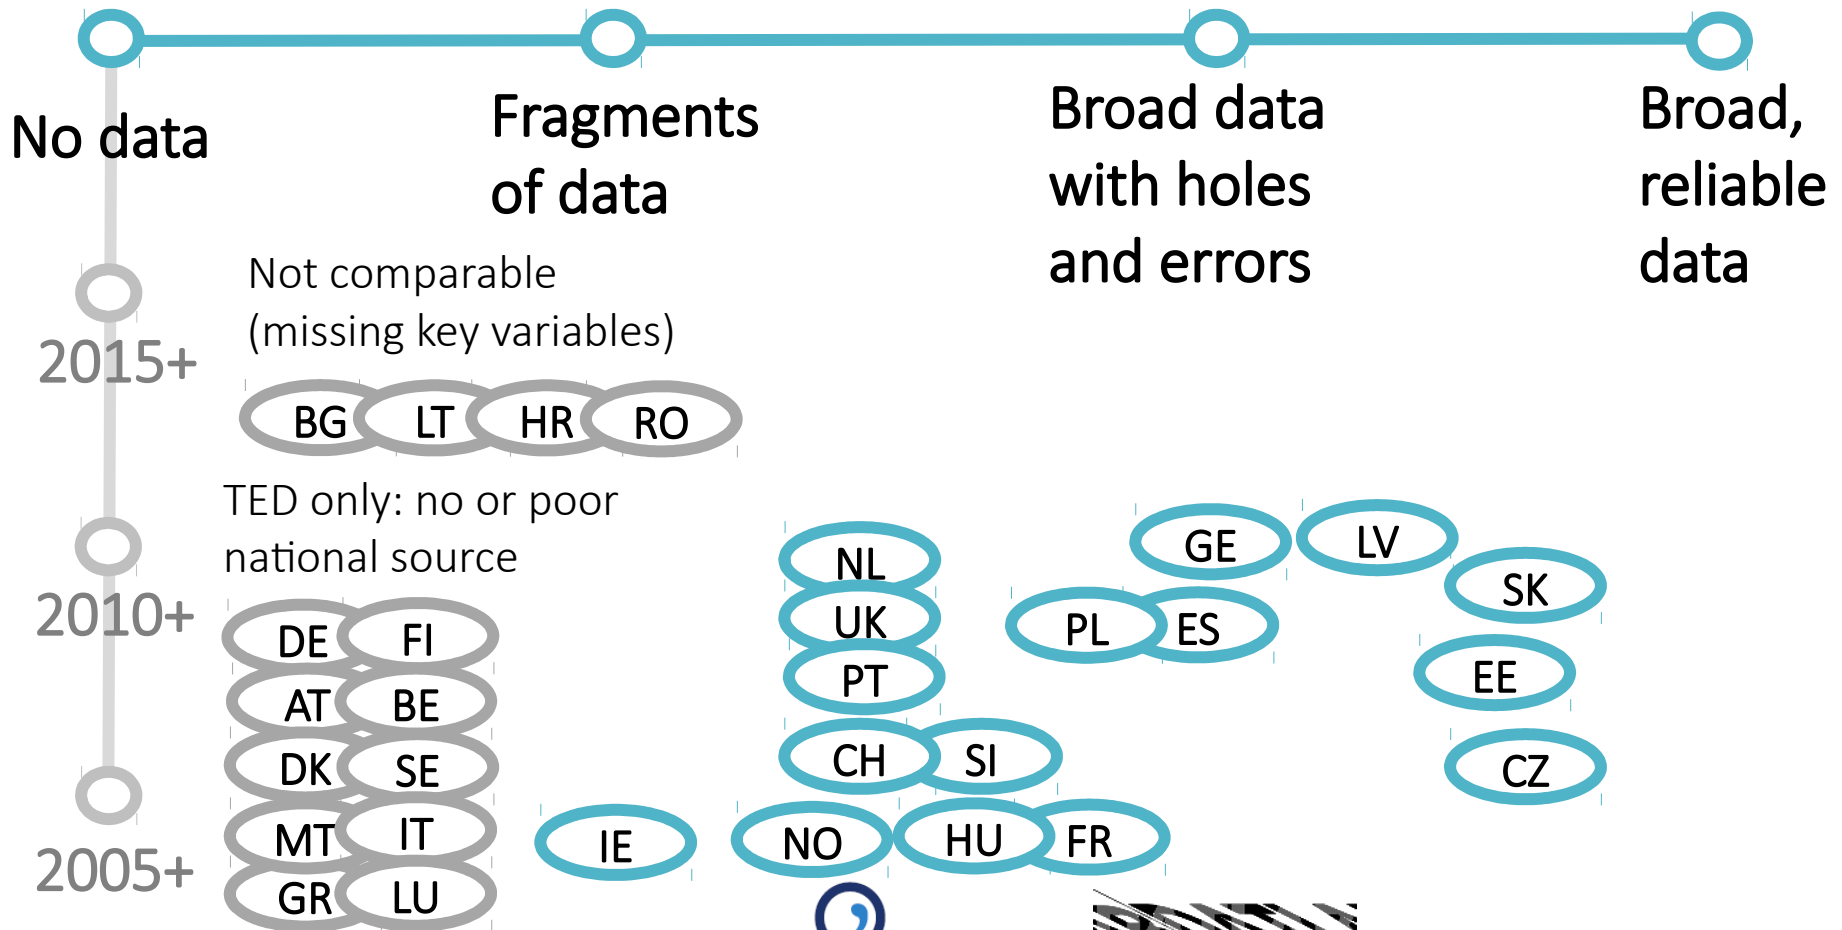

Cross-Country comparison →

Audit →

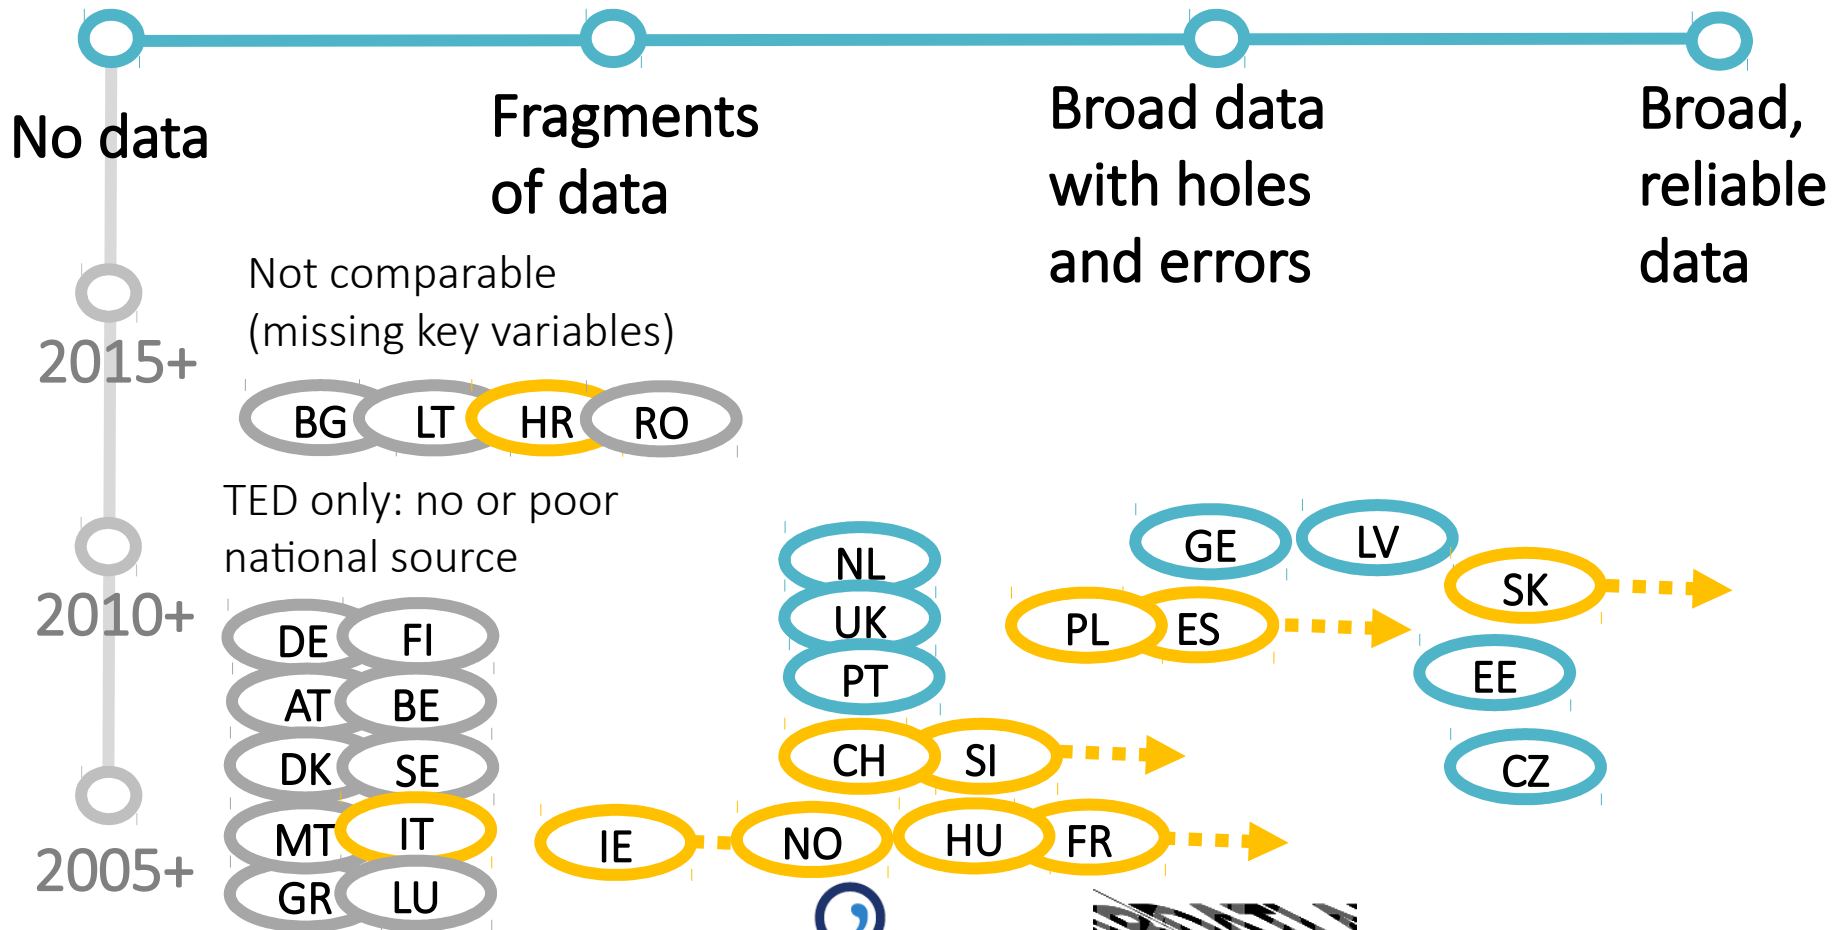

E-services →

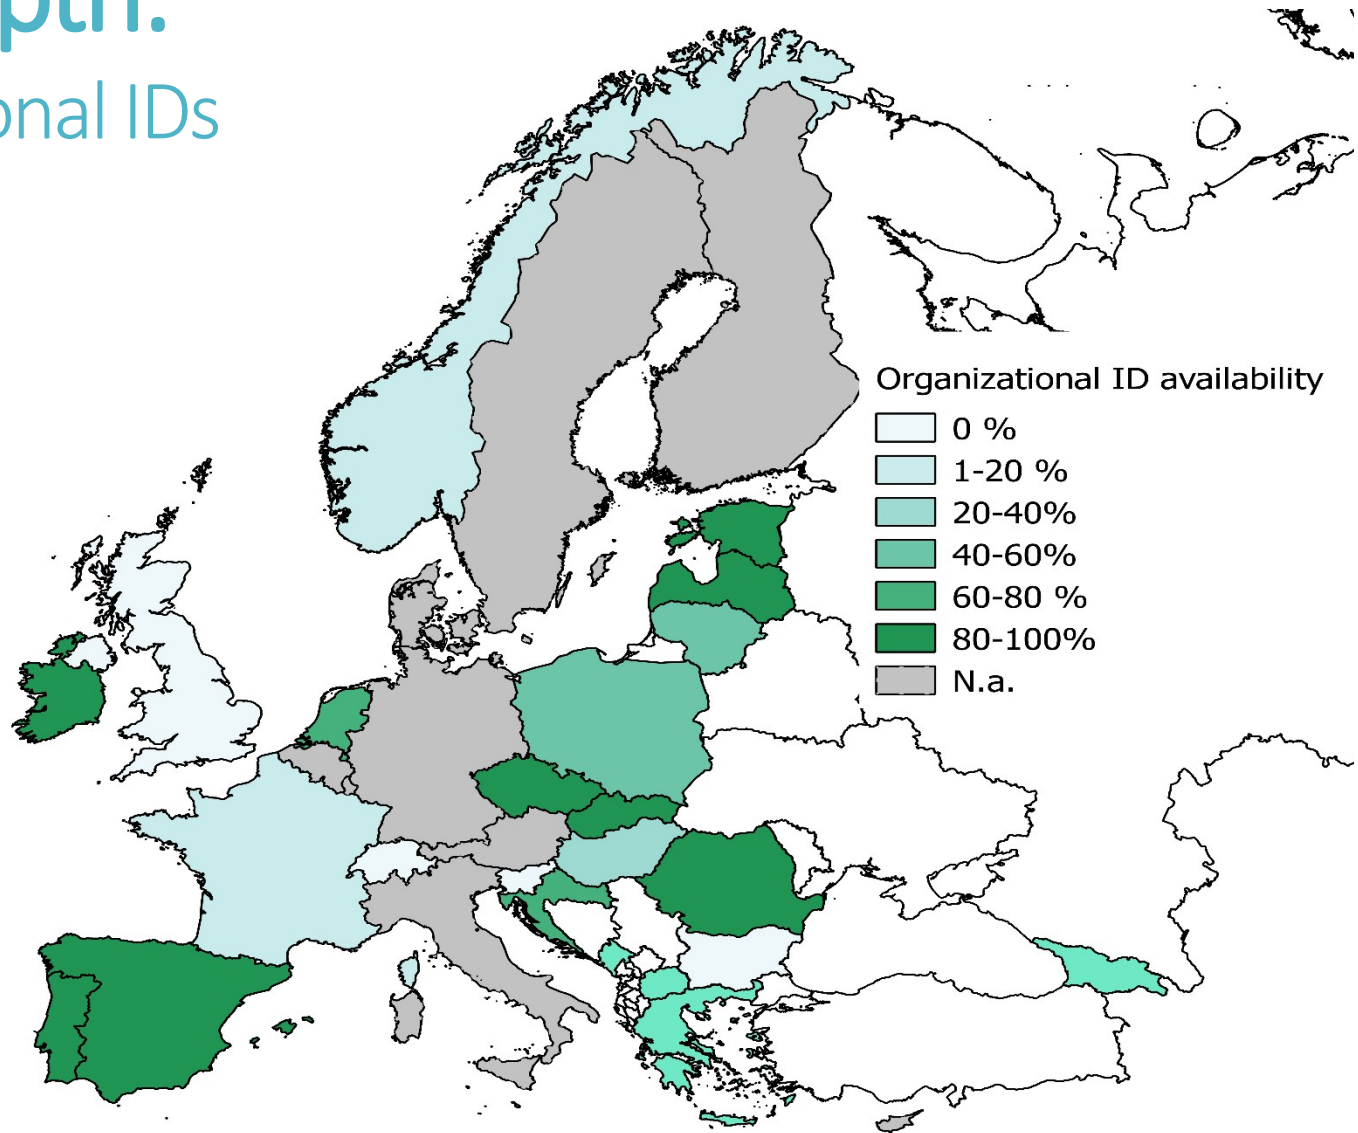

Rough country results

Largest room for further data improvement (known bugs)

Data depth: Organisational IDs availability

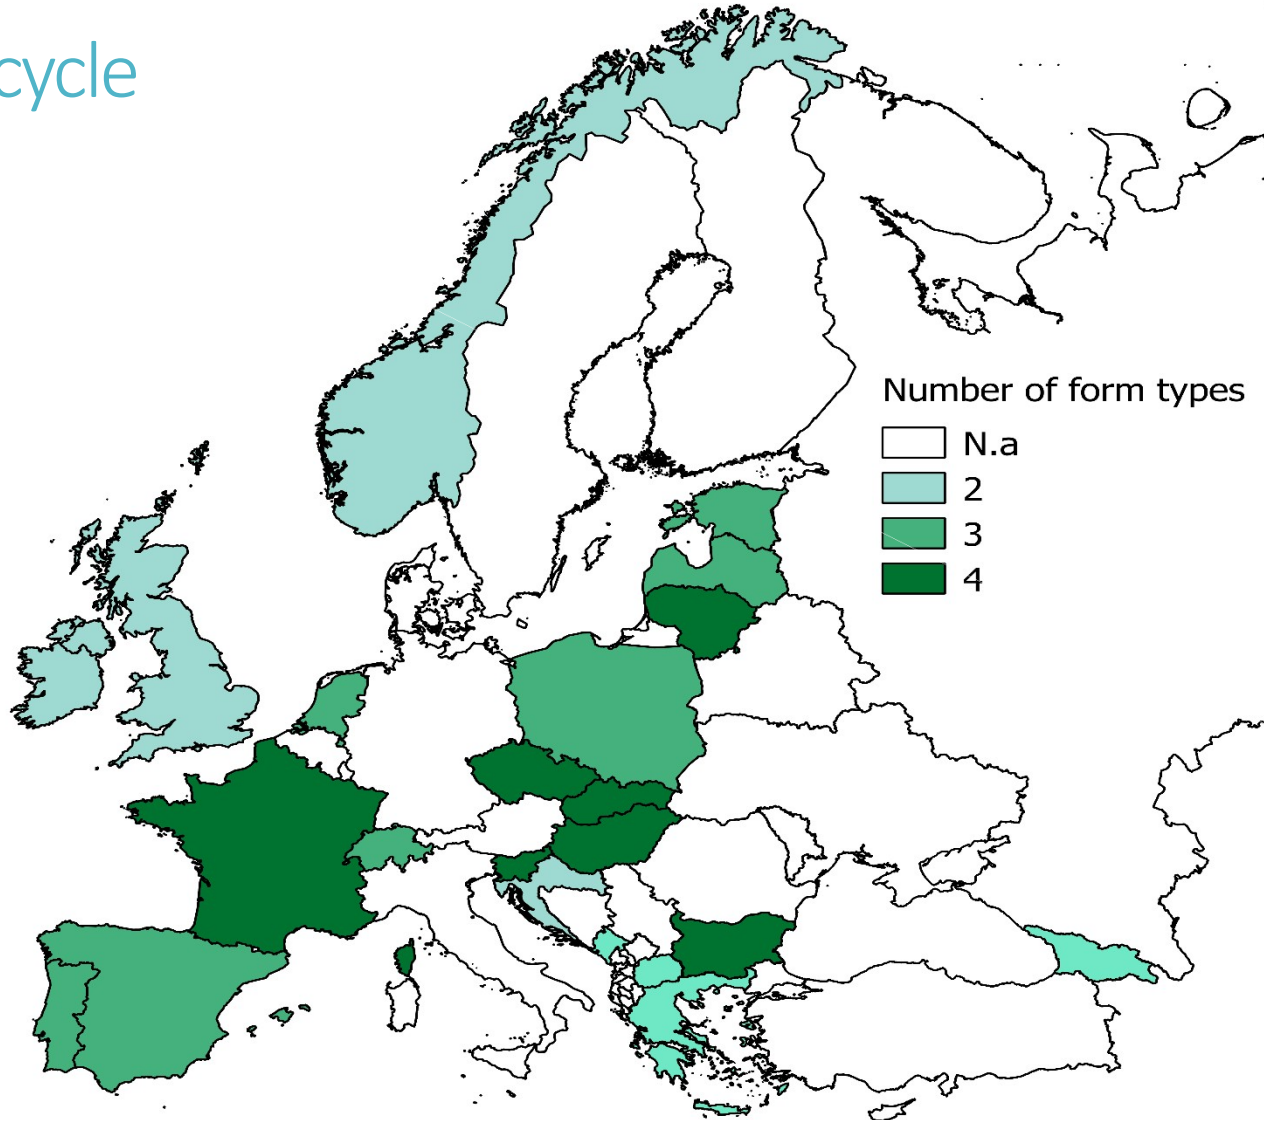

Data depth: Full tender cycle

Availability of:

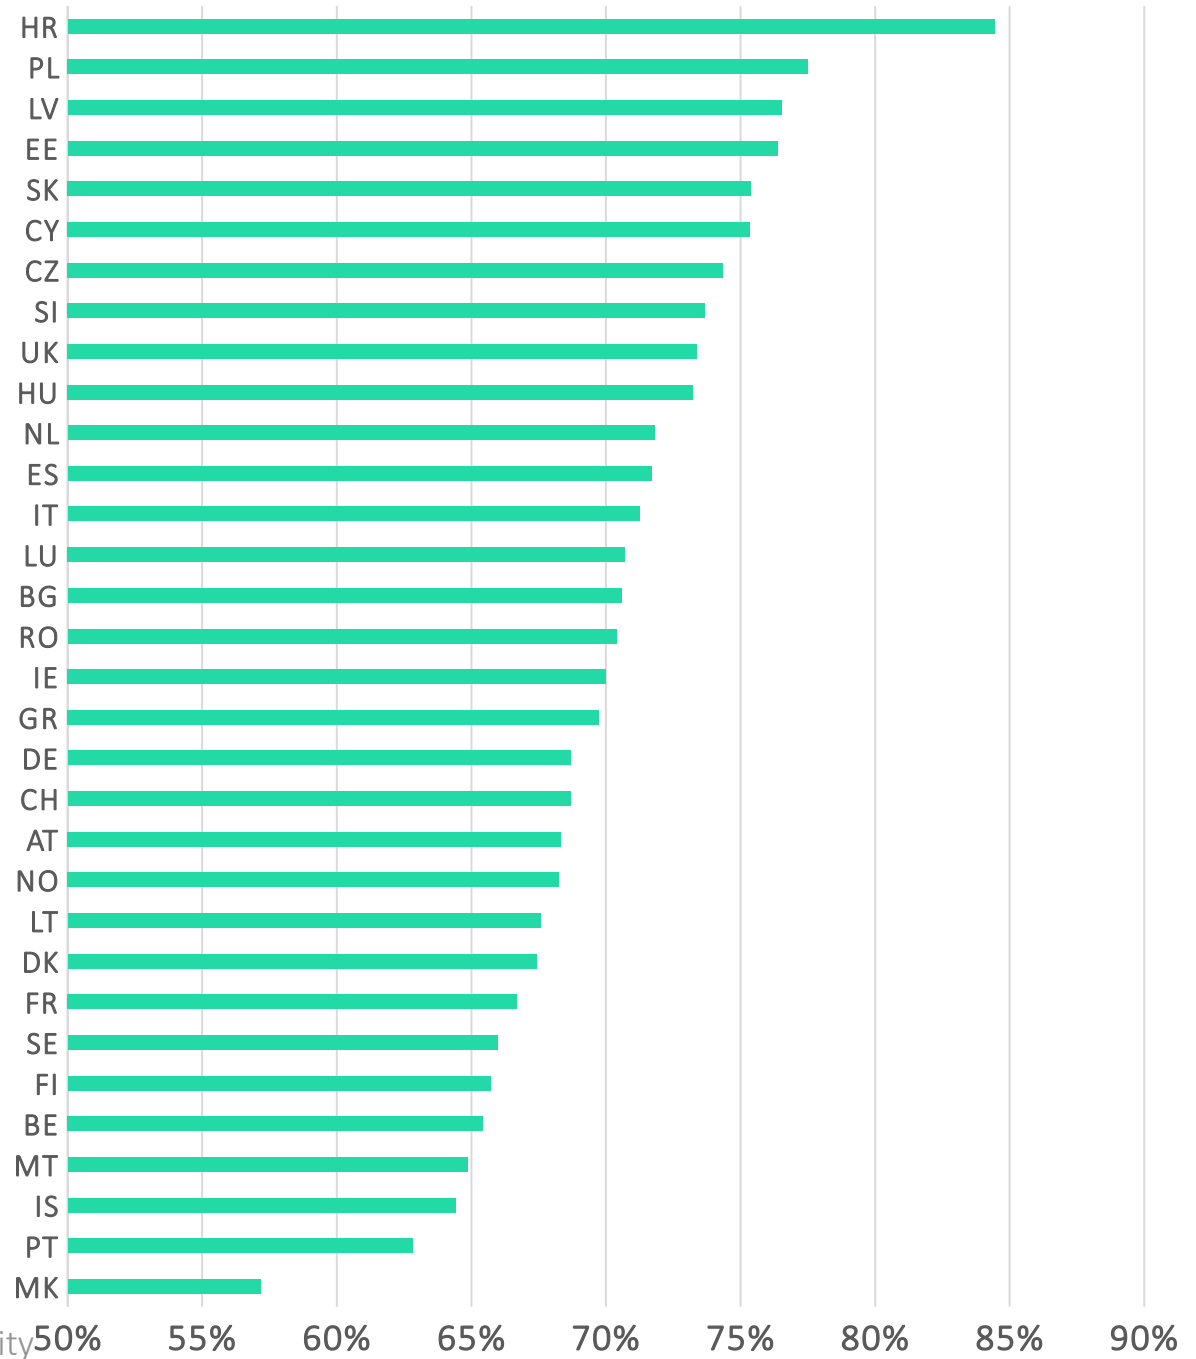

- Contract notices
- Contract awards
- Contract implementations
- Contract cancellations

Data quality: TED

Administrative error: missing information

Average % missing
information (12 mandatory
fields), 2016, TED data

Questions, comments?

- Detailed validation results (work in progress): https://github.com/digiwhist/wp2_documents/blob/master/validation_reports/
